JUNIOR IT CONSULTANT – SAP

BEFFI SOLUTIONS S.L | JUNE 1, 2024 – MARCH 31, 2025

- Functional and technical requirement analysis for data exchange between SAP and external systems.
- ABAP development of a custom IDoc for the client Yanmar Italy as part of the Customer Service workflow.
- Design and construction of custom Z segments for the IDoc, including custom fields, structures, and integration testing.
- Preparation of technical and functional documentation.

HIGHLIGHTED PROJECTS

PERSONAL PORTFOLIO (REACT & TAILWIND)

Interactive web application featuring responsive design, performance optimization, dark mode, and an advanced project carousel.

PETFINDERS – ADOPTION WEB (JAVASCRIPT & APIS)

Final certification project for the JavaScript Bootcamp. Web platform for a cat and dog adoption association allowing users to check available animals and contact via form. (Note: Recently updated due to the deprecation of the original API).

SEA SCHOOL – LANDING PAGE

Responsive landing page for a sailing school featuring service breakdowns, pricing, and a class booking form.

LIFE TRAVEL – LANDING PAGE (FIGMA)

Final project for the UI Design Bootcamp. Responsive travel agency landing page showcasing diverse activities and destinations with a light/dark mode for both desktop and mobile views.

CONTACT MANAGER (PYTHON)

Functional desktop application to add, edit, delete, and view contacts utilizing a graphical interface backed by local TXT files.

LANGUAGES

Spanish – Native

English – B2 (LanguageCert, 2025)
